

Best practice:

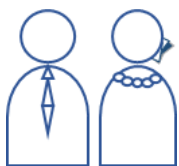

Combine the Master Class with a Company Programme regional event: in this way Hyundai volunteers have the chance to see exactly what students are doing and testify the skills improvement among them.

Benefits for teachers:

- Gain better understanding of the automotive world
- Gain better understanding of the business world
- Establish effective communication systems with the volunteers

Benefits for volunteers:

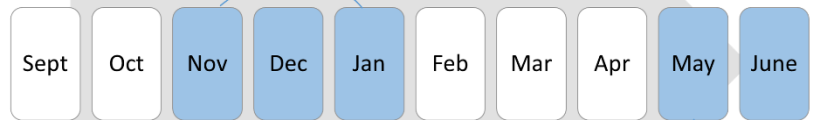

- Develop and improve their communication and collaboration skills
- Get a understanding of how the educational system works nowadays
- Strengthen workplace friendships and professional networks

Master Class for Businesses and Educators

It is a 2-3 hours exercise designed to bring our teachers face to face with business people from Hyundai. It is implemented in the form of bi-annual workshops where teachers and Hyundai employees have the chance to improve, get to know each other and find the best way to implement the Skills for the Future programme.

- Find the best way for volunteers to get involved
- Find new and innovative teaching methodologies
- Build a common understanding of the project and its objectives
- Identify the STEM and entrepreneurial skills needed for a career in the automotive sector.

Master Class Agenda

1. Introduction: JA, Teachers, Hyundai Volunteers
2. Roles, responsibilities and benefits
3. Presentation and agreement on the targets and objectives
4. Find best ways for the implementation
5. Create common working plan / Evaluate results and plane next years' activities.
